ABOUT ME

I graduated from Maltepe University, software engineering department. Work experience was only in the company I did as a compulsory internship. During my internship at the company, I discovered that I more enjoy developing front-end, and most of my time I try to specialize in software languages and frameworks in this field. Personally, I am generally a compatible person. I am someone who pays attention to details and likes order. My expectation from the companies I am looking for a job is to help me develop my profession more. And, as a result, to transfer these developments to the company.

WORK EXPERIENCE

Intern Front-End Developer
Related Digital - Doğuş Group [04/01/2021 – 12/02/2021]

City: İstanbul
Country: Turkey

Customer Data Platform API and Web Analytics Integration
Creating events and triggers in Google Tag Manager and its integrated. Writing the company's e-commerce test site with Vue.js framework and bootstrap library. API is also used as a database. Elimination of disruptions caused by customer's data. Finding and correcting problems in the database by writing necessary queries with my teammate.

Software developers
Demircode ® Yazılım & Web Tasarım Ajansı [07/02/2022 – Current]

City: İstanbul
Country: Turkey

I am using Html, Css, Bootstrap, Javascript, Jquery technologies as frontend. In the backend, I use .Net MVC and MSSQL technologies. I am developing mainly E-commerce sites using these technologies.
